PRODUCT FACT SHEET

PIER SYSTEM

DESIGN BY RONAN & ERWAN BOUROULLEC, 2022

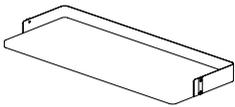

Designed by French designers Ronan & Erwan Bouroullec, Pier System is a multifunctional storage system developed to accommodate and adapt to modern lifestyle requirements. Featuring a flat-pack design that is easy to assemble, reconfigure and recycle, the simple construction provides a flexible shelving solution for organising and storing a multitude of items. Constructed from lightweight aluminium and steel using the minimum number of components required to create a complete storage system, Pier System is available in a variety of colours and set configurations that can be combined with each other. Elements that are part of these configurations can be moved around as needed and desired, enabling the user to incorporate work, wardrobe or organisational functions into most rooms and environments, from living rooms and bedrooms to entrance halls and office areas.

HIGHLIGHTS

- Multifunctional modular storage system designed to accommodate and adapt to modern lifestyle requirements.
- Flexible design enabling it to be extended, moved, or modified to suit infinite spaces and functions.
- Constructed from lightweight aluminium and steel using the minimum number of components required to create a complete configuration.
- Flat-pack design that is easy to assemble and reconfigure.
- Suitable for a wide variety of private and public environments.
- Qualified for contract use.
