

# HOST PORTABLE LAMP

## HIGHLIGHTS

- Simple compact portable lamp
- Integrated magnet in the base of the stem – can attach directly to metallic/magnetic surfaces
- Includes a flat steel base for non-magnetic surfaces such as wood or ceramic
- Host Portable 220 has a minimum of 8 hours of use before the battery requires recharging via USB-C port on the base
- Host portable 300 has a minimum of 16 hours of use before the battery requires recharging via USB-C port on the base
- It is possible to activate Sleep Mode for safe transportation or when not in use for an extended period
- Adaptable to any setting – suitable for both indoor and outdoor use
- Suitable for use in private homes as well as office environments

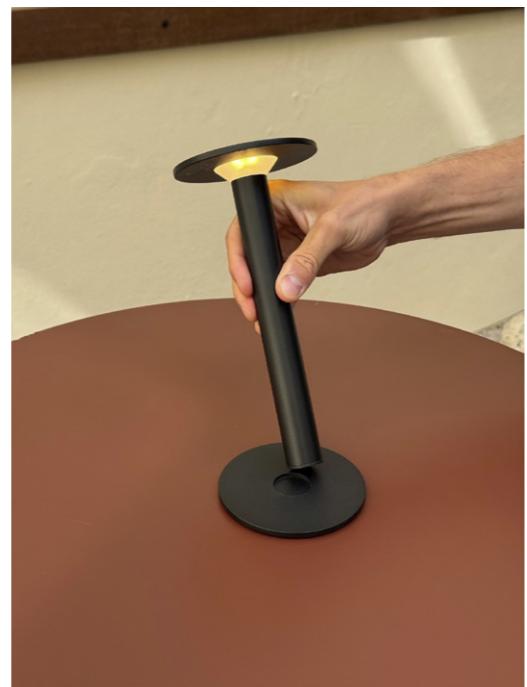

## HOST PORTABLE LAMP DESIGN BY HAY

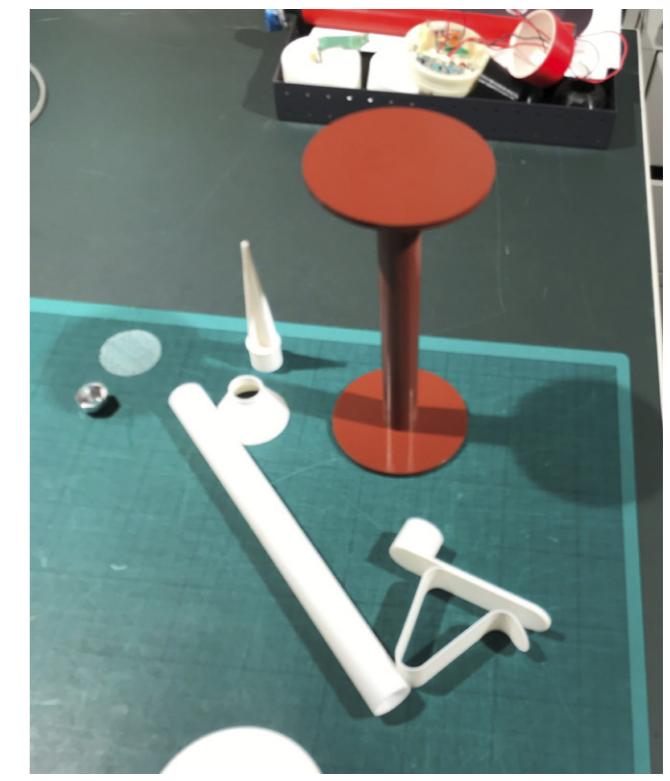

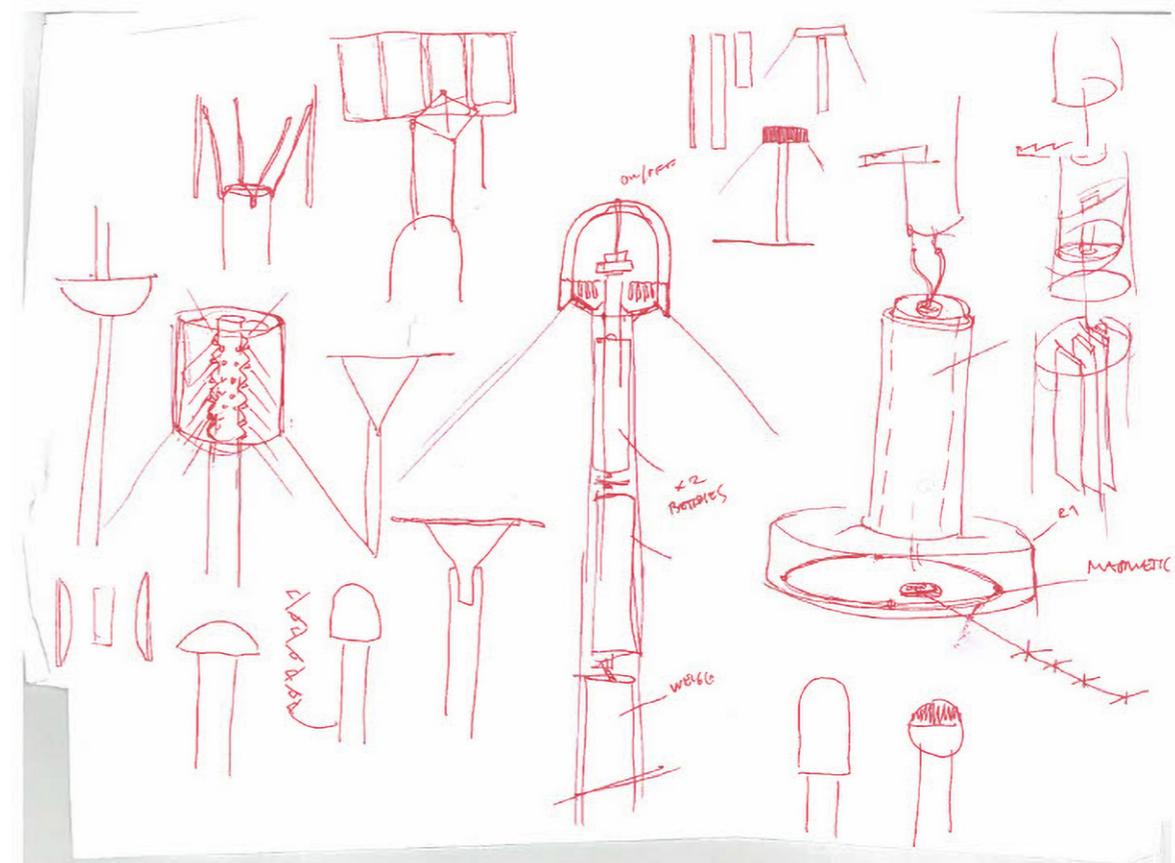

A compact, portable lamp designed to provide light without drawing focus to itself. Its slim profile takes up little space, while the downward cast of light gently illuminates the surface beneath it. An integrated magnet in the base allows attachment to metal surfaces, and a flat steel base is included for use on non-magnetic surfaces. Lightweight and rechargeable via USB-C, it offers cordless flexibility and effortless mobility. Available in various heights and colour options, it works equally well on its own or arranged in groups, making it suited to everything from intimate settings to shared spaces.

Host Portable Lamp family

An integrated magnet in the base allows attachment to metal surfaces, and a flat steel base is included for use on non-magnetic surfaces.

## SLEEP MODE INSTRUCTIONS

### DEACTIVATE SLEEP MODE

The Host Portable Lamp is shipped in Sleep Mode. To wake the lamp, connect and disconnect the supplied charger once. The charging indicator will flash three times. After this, the lamp can be turned on by tapping the top. The lamp is delivered fully charged and ready for use upon unpacking

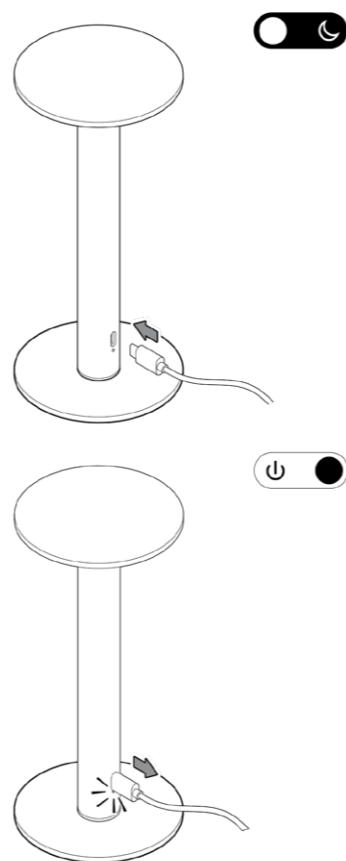

---

### ACTIVATE SLEEP MODE

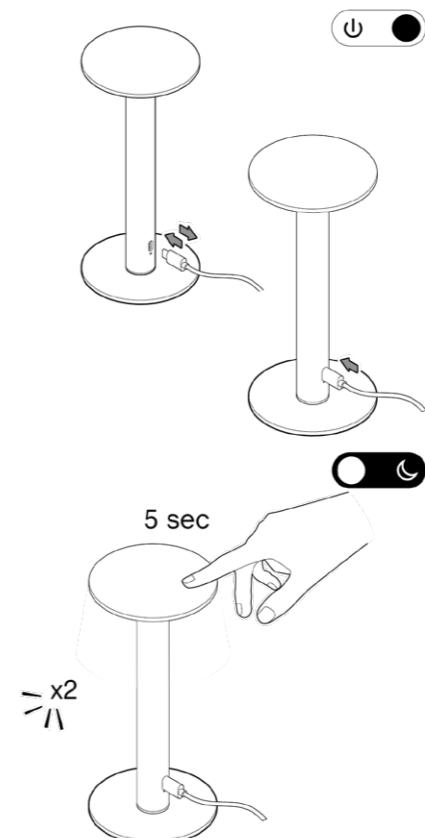

The Host Portable Lamp can be set to Sleep Mode for safe transportation or when not in use for an extended period. To activate Sleep Mode, make sure the lamp is turned off. Connect the supplied charger and then disconnect it again after about two seconds. Reconnect the charger, and touch and hold the shade for five seconds. When the lamp flashes twice, Sleep Mode has been successfully activated
